SAVEMORE PARTICIPATION VALUATION TABLE.....	11

Purpose

The SAVEMORE Participation Share & Valuation Policy establishes a simple and transparent framework for determining the participation value of SAVEMORE, allocating its initial participation shares, determining the entry value for new participants or partners, and ensuring that early participation is recognized as SAVEMORE grows.

The system is designed around two fundamental elements:

- 1. SAVEMORE's initial Participation Shares: 200 units**
 - 2. SAVEMORE's Application/Renewal (Commitment) Fee structure**
-

Initial Participation Share Structure

SAVEMORE was established with an initial participation pool of:

« 200 Participation Shares »

These 200 shares constitute the maximum number of participation units under the initial SAVEMORE participation structure.

As of the adoption of this policy:

- **Total Participation Shares:** 200
- **Shares Already Allotted:** 88
- **Shares Yet to Be Allotted:** 112
- **Current Members:** 39

The 112 unallotted shares remain available for future allocation, subject to SAVEMORE's partnership and participation rules.

Application/Renewal (Commitment) Fee

SAVEMORE operates a progressive Application/Renewal (Commitment) Fee structure based on the number of members/applicants.

Number of Applicants/Members	Commitment Fee
1–40	₦1,000
41–80	₦2,000
81–120	₦3,000
121–160	₦4,000
161–200	₦5,000
201–240	₦6,000
241–280	₦7,000
281–320	₦8,000

The same progression continues in subsequent 40-member blocks, with the commitment fee increasing by ₦1,000 for each additional block of 40 applicants/members.

SAVEMORE Participation Valuation Formula

For the purpose of this internal participation model:

« Value Per Participation Share = Current Commitment Fee »

And:

« SAVEMORE Participation Valuation = 200 × Current Commitment Fee »

Therefore, the number of members determines the applicable commitment-fee tier, while the 200 initial participation shares determine SAVEMORE's total participation valuation.

Current SAVEMORE Valuation

SAVEMORE currently has **39 members**.

Because 39 falls within the **1–40** tier:

« Current Commitment Fee = ₦1,000 »

Therefore:

« Value Per Participation Share = ₦1,000 »

And:

« 200 Shares × ₦1,000 = ₦200,000 »

Current SAVEMORE Participation Valuation:

« ₦200,000 »

The existing 88 allotted shares represent:

« 88 × ₦1,000 = ₦88,000 »

The 112 unallotted shares represent:

« 112 × ₦1,000 = ₦112,000 »

Thus:

Category| Shares| Value

Total Participation Shares| 200| ₦200,000

Allotted Shares| 88| ₦88,000

Unallotted Shares| 112| ₦112,000

Category	Shares	Value
Total Participation Shares	200	₦200,000
Allotted Shares	88	₦88,000
Unallotted Shares	112	₦112,000

Effect of Membership Growth

SAVEMORE's participation value increases when the number of applicants/members moves into a new commitment-fee tier.

For example:

At 40 members

Commitment Fee = ₦1,000

$$\ll 200 \times \text{₦1,000} = \text{₦200,000} \gg$$

At 41 members

Commitment Fee = ₦2,000

$$\ll 200 \times \text{₦2,000} = \text{₦400,000} \gg$$

At 81 members

Commitment Fee = ₦3,000

$$\ll 200 \times \text{₦3,000} = \text{₦600,000} \gg$$

At 121 members

Commitment Fee = ₦4,000

$$\ll 200 \times \text{₦4,000} = \text{₦800,000} \gg$$

At 161 members

Commitment Fee = ₦5,000

$$\ll 200 \times \text{₦5,000} = \text{₦1,000,000} \gg$$

Therefore, the participation valuation increases progressively as SAVEMORE expands its membership base.

Participation Share Entry Value

The value of a newly allotted participation share shall be determined by the current commitment-fee tier at the time of allocation.

For example:

At 39 members:

« 1 Share = ~~N~~1,000 »

At 41 members:

« 1 Share = ~~N~~2,000 »

At 81 members:

« 1 Share = ~~N~~3,000 »

This means that participation becomes progressively more valuable as SAVEMORE grows.

Allocation of the Remaining 112 Shares

The 112 currently unallotted participation shares constitute SAVEMORE's remaining initial participation capacity.

They may be allocated to:

- qualifying existing members;
- strategic partners;
- capital partners;
- operating partners; or
- other persons approved under SAVEMORE's partnership policy.

No person automatically receives participation shares merely because they express interest in SAVEMORE.

Allocation must be approved by SAVEMORE and properly recorded.

Example of Partner Entry

Suppose a qualified partner wants to contribute **₦20,000** when SAVEMORE has 39 members.

Current share value:

« **₦1,000 per share** »

Therefore:

« **₦20,000 ÷ ₦1,000 = 20 shares** »

The partner may therefore be allocated 20 participation shares, subject to the applicable partnership agreement.

If the same **₦20,000** contribution is made after SAVEMORE reaches 41 members:

« **₦20,000 ÷ ₦2,000 = 10 shares** »

Thus, earlier participation receives a natural advantage because the entry value rises as SAVEMORE grows.

Protection of Existing Participants

SAVEMORE shall seek to protect the value of participation already allotted.

Accordingly:

1. New participants shall enter at the prevailing participation-share value.
 2. Previously allotted shares shall not automatically be revalued downward.
 3. Unallotted shares shall be allocated at the prevailing value.
 4. No additional participation shares shall be created under this initial 200-share structure without formal approval.
 5. Any change to the 200-share structure shall require a documented policy amendment.
-

Separation of Customer Funds and Participation Value

The SAVEMORE participation valuation is **not the same thing as the amount of customers' savings held by SAVEMORE.**

Customer savings/contributions must be separately recorded and accounted for according to their contractual nature.

Participation shares represent an interest in the SAVEMORE participation structure; they do not automatically give the holder ownership of customer savings.

Similarly:

« Customer funds ≠ SAVEMORE participation value »

« Customer funds ≠ Partner capital »

« Partner capital ≠ Customer savings »

Proper accounting records shall maintain these distinctions.

Partnership and Ownership

Participation shares shall not automatically confer management authority.

A person holding participation shares may only exercise the rights expressly granted under the relevant SAVEMORE participation or partnership agreement.

In particular, participation does not automatically grant authority to:

- withdraw customer funds;
- access confidential customer information;
- enter contracts on behalf of SAVEMORE;
- make operational decisions;
- appoint or dismiss staff; or
- alter SAVEMORE's policies.

Where participation shares are intended to constitute legally recognized company shares or ownership interests, SAVEMORE shall obtain appropriate legal advice and ensure compliance with applicable Nigerian law.

Review of the Valuation System

The Participation Share & Valuation Policy may be reviewed as SAVEMORE grows.

The purpose of a future review may include consideration of:

- membership growth;
- active-member levels;
- revenue;
- profitability;
- assets;
- liabilities;
- brand value;
- business performance;
- regulatory requirements; and
- the future development of MORE CAPITAL.

The 200-share participation model may therefore serve as SAVEMORE's initial internal valuation framework, while a more comprehensive business valuation may be introduced as the business becomes larger and more sophisticated.

Core Principle

The SAVEMORE participation model is founded on the principle that:

« The earlier people participate in building SAVEMORE, the lower their entry value, while the value of participation rises as SAVEMORE grows. »

This creates a transparent relationship between:

Membership Growth → Commitment Fee → Share Value → SAVEMORE Participation Valuation.

SAVEMORE PARTICIPATION VALUATION TABLE

Members	Fee/Share	Total Value of 200 Shares
1–40	₦1,000	₦200,000
41–80	₦2,000	₦400,000
81–120	₦3,000	₦600,000
121–160	₦4,000	₦800,000
161–200	₦5,000	₦1,000,000
201–240	₦6,000	₦1,200,000
241–280	₦7,000	₦1,400,000
281–320	₦8,000	₦1,600,000

Current Position

Members: 39

Allotted: 88/200 shares

Remaining: 112 shares

Current value per share: ₦1,000

Current participation valuation: ₦200,000
