Introduction

MORE is the **proprietary participation unit** of SAVEMORE.

MORE represents a participant's recognized participation interest within the SAVEMORE ecosystem and provides defined rights under the MORE framework.

The total supply of MORE is fixed at **200 MORE**, with each unit carrying equal participation and dividend rights.

1 MORE = 1 SAVEMORE Participation Unit.

MORE is not the Nigerian Naira, a foreign currency, eNaira, USDT, or any other conventional currency.

MORE Structure

The MORE structure consists of:

- **Maximum supply**: 200 MORE (fixed)
- **Circulating supply**: 200 MORE
- **Dividend-Eligible MORE**: 200
- **Rights per MORE**: Equal
- **Dividend entitlement**: Proportional to MORE held

There are no preferential classes of MORE within this structure.

Therefore:

«1 MORE = 1 equal participation right = 1 equal dividend entitlement.»

How MORE Is Acquired

A person becomes entitled to **1 MORE for each qualifying SAVEMORE Application/Commitment Fee paid in full** at the fee level applicable at the time, whatever that level is.

The level of the Commitment Fee (for example ₦1,000 or ₦2,000) does not change the number of MORE received for a full fee.

For the 100 Days Savings Challenge, MORE allocation is proportional to the slot selected: a ¼ slot (₦500 commitment fee) carries 0.25 MORE, a ½ slot (₦1,000) carries 0.5 MORE and a full slot (₦2,000) carries 1 MORE. MORE allocation is subject to the applicable SAVEMORE MORE Participation & Share Policy.

New members and partners obtain MORE through participation, which requires payment of the application fee applicable to the range of 40 members then in force.

Accordingly:

«1 Full Qualifying Commitment Fee Payment = 1 MORE»

This principle applies regardless of whether the applicable Commitment Fee is ₦1,000, ₦2,000, ₦3,000, ₦4,000 or ₦5,000.

The graduated Commitment Fee structure determines the amount payable for the applicable participation position, while the MORE entitlement remains fixed at one MORE per full qualifying commitment-fee payment.

Progressive Commitment-Fee Structure

SAVEMORE applies a graduated Commitment Fee structure as participation expands. The applicable Commitment Fee is also known as the **MORE Purchasing Price**, and it rises in steps of 40 members:

Participation Position	Commitment Fee (MORE Purchasing Price)	MORE
1–40	₦1,000	1 MORE each
41–80	₦2,000	1 MORE each
81–120	₦3,000	1 MORE each
121–160	₦4,000	1 MORE each
161–200	₦5,000	1 MORE each

The progressive fee therefore affects the cost of obtaining the next MORE, not the quantity of MORE obtained from a full qualifying payment.

For example, a participant paying the applicable **₦1,000 Commitment Fee receives 1 MORE**, while a participant paying the applicable **₦5,000 Commitment Fee also receives 1 MORE**.

The difference is that the latter MORE is acquired at a higher applicable participation cost because of SAVEMORE's progressive participation structure.

Fundamental Issuance Principle

«One full qualifying Commitment Fee Payment creates entitlement to one MORE — irrespective of the fee level.»

Therefore, the 200 MORE are allocated at one MORE per full qualifying participation/commitment-fee position, or proportionally where a part-slot commitment fee applies.

All 200 MORE carry equal fundamental participation and dividend rights.

Creation of MORE

MORE is created at the conceptual/system level by SAVEMORE's establishment of the MORE framework.

Creation refers to SAVEMORE establishing MORE within its participation framework. Issuance refers to the actual allocation of MORE to participants according to the applicable rules.

Therefore, the framework distinguishes between:

Creation → Issuance → Ownership → Participation

The supply of MORE is fixed at 200 MORE. No additional MORE will be created beyond this supply. MORE that is sold back to SAVEMORE may be issued again. MORE is issued by SAVEMORE in

accordance with its approved participation, issuance, accounting and governance rules, subject to applicable laws and regulations.

MORE Nominal Value

The nominal (reference) value of MORE, shown on the SAVEMORE homepage as the MORE Nominal Value, is calculated using the SAVEMORE formula:

«MORE Nominal Value = ₦5n»

Where:

n = total number of SAVEMORE paid applicants.

For example, if SAVEMORE has 40 paid applicants:

₦5 × 40 = ₦200

Therefore:

«1 MORE = ₦200 nominal (reference) value»

The nominal value is determined by the SAVEMORE formula and may change as the number of paid applicants changes. It is a formula figure, not a redemption guarantee.

The circulating MORE units are supported by the naira value designated by SAVEMORE from members' commitment fees paid in connection with savings services rendered. Such backing shall be separately recorded and accounted for by SAVEMORE.

MORE shall not be represented as legal tender or as a sovereign currency. Any future transferability, redemption, exchangeability, blockchain tokenisation, merchant use, or public offering shall be subject to the applicable legal, regulatory, accounting and Shariah requirements.

Transferability of MORE

MORE may be transferred within the SAVEMORE ecosystem subject to the rules, verification procedures and conditions established by SAVEMORE.

Any transfer must be properly recorded in SAVEMORE's official MORE ownership records.

An existing member may sell MORE to a new member on terms agreed between the seller and the buyer. Before the transfer is approved by the admin, the seller pays SAVEMORE the prevailing MORE Nominal Value (₦5n) of the MORE being transferred as a transaction fee. The transfer takes effect only on admin approval.

A transfer changes the holder of the MORE; it does not create an additional MORE.

Therefore:

«Transfer of MORE does not increase the total number of MORE in circulation.»

Selling MORE Back to SAVEMORE

A holder may sell MORE back to SAVEMORE in accordance with the applicable MORE redemption/sell-back rules. Sell-back requests are made through the Member Portal so that each request is recorded.

The reference price for the sell-back shall be determined using the prevailing MORE Nominal Value formula:

«MORE Nominal Value = ₦5n»

Where applicable, the actual amount payable may also be subject to the operational terms, verification requirements and liquidity conditions established by SAVEMORE. MORE that is sold back to SAVEMORE may be issued again.

MORE CAPITAL

MORE CAPITAL is the investment initiative associated with the MORE ecosystem.

MORE CAPITAL may deploy available capital into permissible investments, businesses or other approved opportunities in accordance with its governing framework.

The objective is to generate legitimate business/investment profits that may subsequently be distributed to MORE holders according to the MORE dividend framework.

MORE CAPITAL does not represent a guaranteed-profit arrangement.

Any dividend distribution must be based on actual distributable profit generated by the relevant investment activities.

Dividend Rights of MORE Holders

Every MORE carries an equal dividend right.

Because the supply consists of 200 MORE, the total dividend entitlement is divided according to the number of MORE held by each participant.

The basic calculation is:

«Dividend Per MORE = Total Distributable Dividend ÷ 200»

Then:

«Individual Dividend = MORE Held × Dividend Per MORE»

For example, if MORE CAPITAL has ₦1,000,000 of distributable profit:

₦1,000,000 ÷ 200 = ₦5,000 per MORE

A participant holding:

- 1 MORE receives ₦5,000
- 5 MORE receives ₦25,000
- 10 MORE receives ₦50,000
- 20 MORE receives ₦100,000
- 50 MORE receives ₦250,000
- 100 MORE receives ₦500,000

Subject to the applicable distribution rules, **all 200 MORE participate equally.**

Continuous Dividend Eligibility

A holder of MORE remains entitled to dividends associated with the MORE held, subject to the applicable dividend declaration and distribution rules.

MORE ownership is therefore distinct from an individual's status as an active SAVEMORE savings customer.

A person may cease saving with SAVEMORE while retaining their MORE, unless the MORE framework provides otherwise.

MORE Remains Intact After Leaving SAVEMORE

Leaving or discontinuing a SAVEMORE savings product does not automatically cancel or destroy a participant's MORE.

The MORE remains the property/participation unit recorded in the holder's MORE account, subject to the governing terms.

The holder may continue to retain, transfer or sell the MORE according to the applicable MORE rules.

Equality of the 200 MORE

All 200 MORE have the same fundamental rights.

There are no:

- Premium MORE
- Ordinary MORE
- Founder MORE
- Preferred MORE
- Special dividend MORE

within the 200-unit structure.

Accordingly:

«Every MORE has exactly the same fundamental participation and dividend rights.»

The difference between holders is simply the number of MORE held.

Protection of MORE Holders

The MORE framework is designed to protect the recognized rights of MORE holders through:

1. Clearly defined participation rights.
2. Equal rights among the 200 MORE.
3. Transparent MORE valuation methodology.
4. Official recording of MORE ownership.
5. Defined transfer procedures.
6. Defined sell-back provisions.
7. Proportional dividend entitlement.

8. Transparency concerning MORE CAPITAL activities.
9. Clear distinction between savings funds, MORE and MORE CAPITAL.
10. Formal rules governing the issuance and re-issuance of MORE within the fixed supply of 200.

Any material modification to the fundamental rights attached to MORE would be formally documented and communicated to affected holders.

Fixed Supply of 200 MORE

The supply of MORE is fixed at 200 MORE. No additional MORE will be created beyond this supply.

MORE that is sold back to SAVEMORE may be issued again, in accordance with SAVEMORE's approved issuance rules. Re-issuance does not increase the total supply.

The fundamental rights of the 200 MORE remain protected.

Fundamental MORE Principles

The MORE model can therefore be summarized in nine principles:

1. MORE is SAVEMORE's proprietary participation unit.
2. 1 MORE represents 1 SAVEMORE Participation Unit.
3. The supply of MORE is fixed at 200 units.
4. All 200 MORE have equal participation and dividend rights.
5. Dividend entitlement is proportional to the number of MORE held.
6. MORE has a nominal (reference) value calculated using ₦5n, where n is the number of SAVEMORE paid applicants.
7. MORE may be transferred within the SAVEMORE ecosystem subject to the governing rules.
8. MORE may be sold back to SAVEMORE according to the applicable sell-back rules.
9. No additional MORE will be created beyond the fixed supply; MORE sold back to SAVEMORE may be issued again.

Core Statement

«MORE is the participation unit created by SAVEMORE to recognize participation within its ecosystem. The supply consists of 200 equal MORE units. Each MORE carries equal participation and dividend rights, while the holder's total entitlement is determined by the number of MORE held. MORE CAPITAL may generate legitimate investment/business profits, from which distributable dividends may be allocated proportionally across the 200 MORE.»

Important Governance Note

The MORE framework should be treated as a proprietary business structure and formally documented through SAVEMORE's governing terms, records and member agreements.

Because MORE combines participation rights, a nominal (reference) value, transferability, a sell-back mechanism and participation in investment profits, its final legal and regulatory structure should be reviewed under applicable Nigerian law before public issuance or wider promotion.

For Islamic-finance purposes, MORE CAPITAL distributions should be tied to actual permissible profits rather than guaranteed returns or interest, with the final structure reviewed for Shariah compliance.
