Purpose

The SAVEMORE Participation Share & Valuation Policy establishes a simple and transparent framework for determining the nominal value of SAVEMORE's participation shares (MORE), the cost of obtaining them, and the rules that protect existing participants as SAVEMORE grows.

The system is designed around two fundamental elements:

1. SAVEMORE's participation shares (MORE): a fixed supply of 200 units
2. SAVEMORE's Application/Renewal (Commitment) Fee structure, also known as the MORE Purchasing Price

Participation Share (MORE) Structure

SAVEMORE's participation shares are the unit known as MORE. The supply is fixed at:

« 200 Participation Shares (MORE) »

No additional MORE will be created beyond this supply. MORE that is sold back to SAVEMORE may be issued again. Each MORE carries equal participation and dividend rights, as set out in *MORE 1.0: Rights, Issuance & Dividend Framework.*

Application/Renewal (Commitment) Fee

SAVEMORE operates a progressive Application/Renewal (Commitment) Fee structure based on the number of members/applicants. The fee is also known as the **MORE Purchasing Price** and rises in steps of 40 members:

Number of Applicants/Members	Commitment Fee
1–40	₦1,000
41–80	₦2,000
81–120	₦3,000
121–160	₦4,000
161–200	₦5,000
And so on	Progressive increase

The commitment fee at the time of a new application or renewal is determined by the applicant band then applicable.

MORE Nominal Value Formula

The nominal (reference) value of one MORE is determined by the SAVEMORE formula:

« MORE Nominal Value = ₦5n »

where:

« n = total number of paid applicants »

And:

« Nominal Value of the 200 MORE = 200 × ₦5n »

For example, at 43 paid applicants (as at October 2026):

₦5 × 43 = ₦215 per MORE; 200 × ₦215 = ₦43,000

The nominal value is a formula figure, not a redemption guarantee. It changes as the number of paid applicants changes. The circulating MORE units are supported by the naira value designated by SAVEMORE from members' commitment fees, separately recorded and accounted for by SAVEMORE.

Effect of Membership Growth

As the number of paid applicants grows, the nominal value of each MORE and of the 200-MORE pool grows with it:

Paid applicants (n)	Nominal value of 1 MORE	Nominal value of 200 MORE
40	₦200	₦40,000
80	₦400	₦80,000
120	₦600	₦120,000
160	₦800	₦160,000
200	₦1,000	₦200,000

MORE Allocation and Entry Cost

A person becomes entitled to **1 MORE for each qualifying Application/Renewal (Commitment) Fee paid in full**, at the fee level applicable at the time. For the 100 Days Savings Challenge, allocation is proportional to the slot selected: ¼ slot = 0.25 MORE, ½ slot = 0.5 MORE and full slot = 1 MORE.

The cost of obtaining a MORE is the MORE Purchasing Price (commitment fee) applicable at the time of allocation. For example:

- Applicants 41–80: ₦2,000 = 1 MORE
- Applicants 81–120: ₦3,000 = 1 MORE

New members and partners obtain MORE through participation, which requires payment of the application fee applicable to the range of 40 members then in force.

No person automatically receives MORE merely because they express interest in SAVEMORE. Allocation must be properly recorded.

Transfer of MORE Between Members

Existing members may sell their MORE to new members. The terms of the sale, including the price, are agreed between the seller and the buyer.

Before the transfer is approved by the admin, the seller pays SAVEMORE the prevailing MORE Nominal Value (₦5n) of the MORE being transferred as a transaction fee. For example, at 43 paid applicants (as at October 2026) the nominal value is ₦215 per MORE.

A transfer takes effect only after admin approval and is recorded in SAVEMORE's official MORE ownership records. It changes the holder; it does not create additional MORE.

Protection of Existing Participants

SAVEMORE shall seek to protect the rights of existing MORE holders. Accordingly:

1. New participants shall enter at the prevailing MORE Purchasing Price.
2. All MORE carry equal participation and dividend rights.
3. No additional MORE shall be created beyond the fixed supply of 200.
4. Any change to the 200-MORE structure shall require a documented policy amendment, communicated to affected holders.

Separation of Customer Funds and Participation Value

The MORE nominal value is not the same thing as the amount of customers' savings held by SAVEMORE. Customer savings/contributions must be separately recorded and accounted for according to their contractual nature.

Participation shares represent an interest in the SAVEMORE participation structure; they do not automatically give the holder ownership of customer savings. Similarly:

« Customer funds ≠ SAVEMORE participation value »

Proper accounting records shall maintain this distinction.

Partnership and Ownership

Participation shares shall not automatically confer management authority. A person holding participation shares may only exercise the rights expressly granted under the relevant SAVEMORE participation agreement. In particular, participation does not automatically grant authority to:

- withdraw customer funds;
- access confidential customer information;
- enter contracts on behalf of SAVEMORE;
- make operational decisions;
- appoint or dismiss staff; or
- alter SAVEMORE's policies.

Where participation shares are intended to constitute legally recognized company shares or ownership interests, SAVEMORE shall obtain appropriate legal advice and ensure compliance with applicable Nigerian law.

Review of the Valuation System

The Participation Share & Valuation Policy may be reviewed as SAVEMORE grows. A future review may consider membership growth, active-member levels, revenue, profitability, assets, liabilities, business performance, regulatory requirements and the future development of MORE CAPITAL.

The ₦5n formula may therefore serve as SAVEMORE's internal valuation framework, while a more comprehensive business valuation may be introduced as the business becomes larger.

Core Principle

The SAVEMORE participation model creates a transparent relationship between:

Membership Growth → Paid Applicants (n) → MORE Nominal Value (₦5n)

Membership Growth → MORE Purchasing Price (rises in steps of 40 members)

SAVEMORE Participation Valuation Table

Paid applicants (n)	Nominal value of 1 MORE	Nominal value of 200 MORE	MORE Purchasing Price
1–40	₦5n (₦200 at 40)	200 × ₦5n	₦1,000
41–80	₦5n (₦400 at 80)	200 × ₦5n	₦2,000
81–120	₦5n (₦600 at 120)	200 × ₦5n	₦3,000
121–160	₦5n (₦800 at 160)	200 × ₦5n	₦4,000
161–200	₦5n (₦1,000 at 200)	200 × ₦5n	₦5,000
