EXECUTIVE SUMMARY

SAVEMORE is a savings and financial support platform operating under **MORESALES VENTURE**, a business registered with the Corporate Affairs Commission (BN: 3605081).

Founded by **Abideen Ibidunni Okunade**, a technopreneur from Osogbo, SAVEMORE was established to promote disciplined savings, financial transparency, responsible financial participation, and access to structured financial opportunities.

SAVEMORE currently operates four savings products:

1. Investment Savings Account
2. Emergency Savings Account
3. In-Dollar Savings Account
4. 100 Days Savings Challenge

Beyond savings, SAVEMORE has developed a participation-share structure, known as **MORE**, that provides the foundation for **MORE CAPITAL**, its future investment initiative. The total supply of MORE is fixed at 200.

MORE CAPITAL is designed to operate as an investor rather than a lending institution. Its initial capital is represented by the value assigned to SAVEMORE's 200 participation shares.

At the current paid-applicant base of 43 (as at October 2026), each participation share has a calculated value (the MORE Nominal Value) of:

5n = 5 × 43 = ₦215

With 200 participation shares:

200 × ₦215 = ₦43,000

Thus, the current MORE CAPITAL capital equivalent is **₦43,000.**

When the capital reaches the equivalent of **US$100**, In Sha Allah, MORE CAPITAL intends to begin investment activities, with **BUYMORE4AFRICA** as its first intended investment opportunity, under an appropriate legal and regulatory structure.

MORE CAPITAL will participate as an investor alongside other investors in BUYMORE4AFRICA. Any return will depend on actual investment performance. Where distributable profits arise, eligible SAVEMORE members may receive dividends according to the eventual MORE CAPITAL distribution framework.

No investment return or dividend is guaranteed.

ABOUT SAVEMORE

What is SAVEMORE?

SAVEMORE is a structured savings and financial support platform created to help individuals develop disciplined saving habits while building a transparent financial ecosystem.

The platform is built around four principles:

- **Discipline** — encouraging consistent saving.
- **Transparency** — maintaining clear and accountable financial records.
- **Participation** — rewarding consistent involvement through SAVEMORE's participation system.
- **Growth** — creating a pathway from saving to future investment opportunities.

SAVEMORE is a business initiative under MORESALES VENTURE and is not a cooperative society.

VISION

To build a trusted savings and investment ecosystem that helps individuals develop financial discipline, participate in productive opportunities, and contribute to sustainable wealth creation.

MISSION

To provide simple, transparent and structured savings opportunities while developing a responsible pathway through which accumulated capital can participate in productive investments.

CORE VALUES

Transparency

Members should be able to understand the rules governing their savings, participation and financial activities.

Accountability

Financial records and activities should be properly documented and managed.

Discipline

SAVEMORE encourages members to develop consistent and responsible savings habits.

Fairness

Participation and future benefits should be governed by clearly defined rules rather than arbitrary decisions.

Responsibility

SAVEMORE recognizes that financial activities involve risks and therefore seeks to operate responsibly.

Growth

The long-term objective is to move beyond saving toward productive investment and financial development.

SAVEMORE SAVINGS PRODUCTS

SAVEMORE currently operates four savings products.

Investment Savings Account

The Investment Savings Account is designed for members who wish to build savings over a defined period.

Current features

- Transparent financial structure
- ₦1,000 minimum savings
- 10-week minimum lock-up duration
- 50-week maximum savings duration
- Withdrawal by request through the Member Portal
- Commitment fee set by the applicable applicant band (₦1,000 when n ≤ 40; currently ₦2,000 for members 41–80)

The account is designed around disciplined savings rather than interest-bearing deposits.

Emergency Savings Account

The Emergency Savings Account is designed to provide members with a structured place to build funds for unexpected financial needs.

Current features

- Transparent financial structure
- ₦1,000 minimum savings
- No lock-up duration
- 50-week maximum savings duration
- Withdrawal by request through the Member Portal
- Commitment fee set by the applicable applicant band (₦1,000 when n ≤ 40; currently ₦2,000 for members 41–80)

The absence of a lock-up period provides greater accessibility for emergency-oriented savings.

In-Dollar Savings Account

The In-Dollar Savings Account allows members to build savings denominated in United States dollars rather than naira. Savings are held as USDT (dollar equivalent).

Current features

- Zero-interest structure
- Transparent financial structure
- ₦5,000 minimum deposit
- 10-week lock-up duration
- No maximum savings duration currently specified
- Withdrawal by request through the Member Portal

- US$1 commitment fee when n ≤ 40

The account is intended for members who wish to maintain savings exposure in US dollars.

100 Days Savings Challenge

The 100 Days Savings Challenge is designed to encourage consistent daily saving over a 100-day period.

Current features

- Zero-interest structure
- Transparent financial structure
- Slots of ₦500, ₦1,000 or ₦2,000 a day (¼ slot, ½ slot or full slot)
- Payment daily or every 5 days (a full slot is ₦2,000 daily or ₦10,000 per 5 days)
- Withdrawal after all deposits are completed
- Commitment fee per slot for existing members: ¼ slot ₦500, ½ slot ₦1,000, full slot ₦2,000
- MORE allocation proportional to the slot selected (0.25, 0.5 or 1 MORE)

The 100-day period consists of 20 five-day payment cycles:

20 × 5 days = 100 days

Choosing a slot lets members commit an amount that fits their income while keeping to the same 100-day discipline. MORE allocation is subject to the applicable SAVEMORE MORE Participation & Share Policy.

COMMITMENT FEE STRUCTURE

SAVEMORE uses a progressive commitment fee structure based on the total number of applicants. The applicable fee is also known as the **MORE Purchasing Price** and rises in steps of 40 members.

For the first applicant band:

« When n ≤ 40, the commitment fee is ₦1,000. »

The fee subsequently increases by applicant bands as SAVEMORE grows. At the current stage (as at October 2026), the applicable fee is **₦2,000** (members 41–80).

The current structure is:

Total Applicants (n)	Commitment Fee
1–40	₦1,000
41–80	₦2,000
81–120	₦3,000
121–160	₦4,000
161–200	₦5,000
And so on	Progressive increase

The commitment fee at the time of a new application or renewal is determined by the applicant band then applicable.

SAVEMORE PARTICIPATION SHARE SYSTEM

Nature of the Share

SAVEMORE's share is a participation/benefit share, not an ownership or equity share in SAVEMORE. The participation share is the unit known as **MORE** (see *MORE 1.0: Rights, Issuance & Dividend Framework*).

The participation share does not by itself confer ownership of MORESALES VENTURE, SAVEMORE, BUYMORE4AFRICA, or MORE CAPITAL.

It is a unit used within SAVEMORE's participation and future MORE CAPITAL framework.

One Commitment Fee = One Share

The fundamental allocation rule is:

« 1 full qualifying commitment fee = 1 participation share (1 MORE). »

For the 100 Days Savings Challenge, the allocation is proportional to the slot selected: a ¼ slot carries 0.25 share, a ½ slot carries 0.5 share and a full slot carries 1 share. Allocation is subject to the applicable SAVEMORE MORE Participation & Share Policy.

A qualifying renewal by an existing applicant similarly generates the applicable participation allocation under SAVEMORE's rules. Therefore, the number of allotted shares is connected to the member's participation history.

Acquiring and Transferring MORE

New members and partners obtain MORE through participation, which requires payment of the application fee applicable to the range of 40 members then in force.

Existing members may sell their MORE to new members on terms agreed between them. Before the transfer is approved by the admin, the seller pays SAVEMORE the prevailing MORE Nominal Value (₦5n) of the MORE being transferred as a transaction fee.

SHARE VALUE FORMULA

The calculated value of one SAVEMORE participation share (the MORE Nominal Value) is determined by:

« Share Value = 5n »

where:

« n = total number of paid applicants »

For example, where there are 43 paid applicants (as at October 2026):

5 × 43 = ₦215

Therefore:

« 1 share = ₦215 »

If the number of paid applicants changes, the calculated value of each share changes accordingly. The value is a formula figure, not a redemption guarantee.

Illustrative examples

Paid applicants (n)	Value of 1 Share
20	₦100
40	₦200
43	₦215
50	₦250
80	₦400
100	₦500
120	₦600

The formula is intended to create a relationship between SAVEMORE's growing applicant base and the calculated value of its participation-share pool.

FIXED SUPPLY OF 200 SHARES

SAVEMORE's participation-share pool consists of:

« 200 shares »

The supply is fixed at 200. No additional shares (MORE) will be created beyond this supply. Shares that are sold back to SAVEMORE may be issued again.

At the current paid-applicant base (as at October 2026):

n = 43

Therefore:

Share value = 5 × 43 = ₦215

And:

200 shares × ₦215 = ₦43,000

Thus:

« Share Capital Equivalent = ₦43,000 »

This amount forms the capital foundation designated for MORE CAPITAL.

MORE CAPITAL

What is MORE CAPITAL?

MORE CAPITAL is an investment initiative established from the capital foundation created through SAVEMORE's participation-share structure.

MORE CAPITAL is intended to operate as an investor, not as a lending institution. Its purpose is to deploy accumulated capital into productive investment opportunities.

Initial MORE CAPITAL

The participation-share structure consists of 200 shares. At the current paid-applicant base of 43:

« 200 × (5 × 43) = ₦43,000 »

« Current MORE CAPITAL capital equivalent = ₦43,000 »

The current amount is not yet considered substantial enough for investment deployment. MORE CAPITAL will therefore accumulate until it reaches its initial investment threshold.

MORE CAPITAL INVESTMENT THRESHOLD

The initial investment threshold for MORE CAPITAL is:

« US$100 equivalent »

When the capital reaches the equivalent of US$100, In Sha Allah, MORE CAPITAL intends to commence investment activity, under an appropriate legal and regulatory structure. The investment threshold is intended to ensure that the capital is sufficiently meaningful before deployment.

MORE CAPITAL AND BUYMORE4AFRICA

The first intended investment opportunity for MORE CAPITAL is:

« BUYMORE4AFRICA »

BUYMORE4AFRICA is a spot-crypto trading business operating separately from SAVEMORE.

MORE CAPITAL is intended to participate in BUYMORE4AFRICA as an investor alongside other investors. This means MORE CAPITAL is not being established as a loan facility for BUYMORE4AFRICA.

The investment relationship will be governed by the applicable investment terms and the actual performance of the business.

PROFIT AND DIVIDEND FRAMEWORK

MORE CAPITAL's investment returns will depend on the actual performance of the investment.

Where BUYMORE4AFRICA generates distributable profit attributable to MORE CAPITAL, such profit may form the basis for distributions to eligible SAVEMORE members.

The eventual dividend framework will take into consideration the established MORE CAPITAL rules, including member participation and eligibility criteria.

Important principle

« Dividends are not guaranteed. »

A profitable investment may generate distributable returns, while an investment may also generate lower-than-expected returns or losses. MORE CAPITAL therefore does not promise a fixed return to SAVEMORE members.

MEMBER PARTICIPATION AND MORE CAPITAL

The number of participation shares allotted to a member will be one of the criteria considered when determining participation or eligibility under MORE CAPITAL. However, share allocation will not be the sole criterion.

Future MORE CAPITAL assessment may also consider factors such as:

- Savings consistency
- Contribution discipline
- Length and quality of participation
- Certificates and points
- Member performance records
- Business viability
- Risk assessment
- Available investment capital
- Other criteria established by MORE CAPITAL

« More shares do not automatically guarantee investment. »

The purpose of incorporating share allocation into the assessment is to recognize participation while maintaining a broader and more responsible evaluation framework.

CERTIFICATES AND MEMBER RECOGNITION

SAVEMORE may issue periodic certificates to recognize members who demonstrate diligent participation and responsible savings behaviour.

Certificates serve as a recognition mechanism and may also contribute to a member's performance record. Over time, the certificate and points system may form part of the information considered by MORE CAPITAL when evaluating eligible members.

The recognition system is therefore intended to encourage:

- Consistency

- Discipline
- Timely participation
- Responsible financial behaviour
- Long-term engagement with SAVEMORE

ISLAMIC FINANCE PRINCIPLES

SAVEMORE intends to structure its financial activities around principles associated with Islamic finance. These principles include:

Avoidance of Riba

SAVEMORE's financial support and investment structures are intended to avoid interest-based returns.

Avoidance of Excessive Gharar

Financial arrangements should be sufficiently clear and transparent so that participants understand the relevant terms, obligations, risks and potential outcomes.

Avoidance of Maysir

SAVEMORE intends to avoid gambling-based financial arrangements and structures that depend on games of chance.

Halal Economic Activity

Where SAVEMORE or MORE CAPITAL participates in investments, the underlying activities should be assessed for permissibility.

Risk and Reward

Investment returns should arise from genuine investment performance rather than a guaranteed return merely for providing capital.

Transparency

Members should have access to clear information concerning the rules governing their participation and the financial activities of the platform.

Fairness

SAVEMORE seeks to establish rules that treat participants fairly and avoid unjust enrichment or exploitation.

IMPORTANT SHARIAH POSITION

SAVEMORE's intention to operate according to Islamic finance principles does not by itself constitute formal Shariah certification.

The precise structure of its participation shares, MORE CAPITAL investment arrangements, profit distribution mechanism and other financial contracts should be reviewed by appropriately qualified

Islamic finance/Shariah scholars before SAVEMORE makes a formal claim of Shariah compliance. This is particularly important as MORE CAPITAL develops into an investment vehicle.

RISK MANAGEMENT

SAVEMORE recognizes that financial activities involve risks. Key risks include:

Operational Risk

Risk arising from errors, system failures, record-keeping problems or operational weaknesses.

Business Risk

Risk arising from changes in the business environment, customer behaviour or operating conditions.

Liquidity Risk

Risk that funds may not be immediately available when required.

Investment Risk

MORE CAPITAL investments may experience gains or losses depending on actual performance.

Market Risk

Investment values may change due to movements in relevant markets.

Member Risk

The financial behaviour of members may affect the operation of SAVEMORE's programs.

Technology and Security Risk

Digital records and financial information require appropriate protection against loss, unauthorized access and other threats.

SAVEMORE intends to strengthen its systems, documentation and controls as the platform grows.

TRANSPARENCY AND RECORD KEEPING

SAVEMORE's growth requires reliable financial and participation records. Records should include, where applicable:

- Member information
- Savings contributions
- Commitment fees
- Participation-share allocations
- Share calculations
- Certificates
- Points/performance records
- MORE CAPITAL capital records

- Investment records
- Distributions

Proper documentation is essential to maintaining member confidence and accountability. Withdrawal and sell-back requests are made through the Member Portal so that each request is recorded.

SEPARATION OF SAVEMORE AND MORE CAPITAL

Although MORE CAPITAL originates from SAVEMORE's participation-share framework, the two concepts should remain clearly distinguishable.

SAVEMORE

Focuses primarily on:

- Savings
- Financial discipline
- Member participation
- Financial education
- Transparent financial administration

MORE CAPITAL

Focuses primarily on:

- Capital accumulation
- Investment
- Investment risk
- Investment returns
- Distribution of realized profits according to established rules

This separation allows SAVEMORE to remain a savings platform while MORE CAPITAL develops as its investment initiative.

SEPARATION FROM BUYMORE4AFRICA

BUYMORE4AFRICA is an investment opportunity for MORE CAPITAL, not a savings product of SAVEMORE. The relationship can therefore be represented as:

SAVEMORE → Participation & capital foundation → MORE CAPITAL → Investor → BUYMORE4AFRICA → Trading business → Investment performance → Potential distributable profit

MORE CAPITAL's investment in BUYMORE4AFRICA does not guarantee a profit.

GROWTH MODEL

As SAVEMORE's paid-applicant base grows, the calculated value of each participation share also changes according to:

« Share Value = 5n »

For example:

At 43 paid applicants (as at October 2026)

5 × 43 = ₦215/share; 200 × ₦215 = ₦43,000

At 80 paid applicants

5 × 80 = ₦400/share; 200 × ₦400 = ₦80,000

At 120 paid applicants

5 × 120 = ₦600/share; 200 × ₦600 = ₦120,000

This provides a mathematical connection between SAVEMORE's applicant growth and the calculated value of its 200-share pool.

FUTURE DEVELOPMENT

SAVEMORE's long-term development follows the roadmap published on the SAVEMORE website (2026–2030+):

Phase 1 — Foundation (2026)

SAVEMORE's website, savings products, member registration, KYC framework, MORE framework and financial education series have been launched. Ongoing work continues to:

- Strengthen savings operations
- Improve member records
- Expand participation
- Improve transparency

Phase 2 — Digital Transformation (2027)

Building on the Member Portal and administrative dashboard already in place:

- Automated savings records
- Payment integration
- Digital statements and receipts

Phase 3 — Growth (2028)

- Expand membership
- Strengthen referrals
- Increase financial education
- Grow savings participation

Phase 4 — MORE CAPITAL (2028–2029)

- Build the capital base
- Reach the US$100 initial investment threshold
- Commence investment activity, In Sha Allah, under an appropriate legal and regulatory structure

Phase 5 — Member Business Investment (2029)

Explore performance-based investment opportunities in members' businesses, subject to proper evaluation and applicable legal and regulatory requirements.

Phase 6 — Investment Ecosystem (2030+)

- Develop a broader ecosystem connecting savings, education, capital formation and productive investment
- Expand MORE CAPITAL investment opportunities
- Develop stronger member-performance assessment
- Improve profit-distribution mechanisms
- Explore additional permissible investment opportunities

GOVERNANCE AND ACCOUNTABILITY

As SAVEMORE and MORE CAPITAL grow, governance mechanisms should evolve accordingly. These may include:

- Clear financial policies
- Defined authorization procedures
- Separation of records
- Periodic financial reporting
- Investment documentation
- Conflict-of-interest policies
- Risk management procedures
- Independent review where appropriate
- Shariah advisory review where appropriate

The objective is to ensure that growth does not compromise transparency or accountability.

IMPORTANT DISCLOSURES

SAVEMORE participation shares (MORE) are not conventional ownership shares in SAVEMORE. They do not automatically represent:

- Equity ownership in MORESALES VENTURE
- Ownership of SAVEMORE

- Ownership of BUYMORE4AFRICA
- Guaranteed monetary returns
- Guaranteed investment
- Guaranteed dividends

MORE CAPITAL investments are subject to investment risk.

The value attributed to participation shares under the 5n formula is a calculated value within SAVEMORE's internal participation and MORE CAPITAL framework. It is a formula figure, not a redemption guarantee, and should not automatically be interpreted as cash available for withdrawal or as a market valuation of SAVEMORE. MORE shall not be represented as legal tender or as a sovereign currency.

The eventual MORE CAPITAL investment and dividend framework should be documented in a separate, detailed policy before investment activities commence.

CONCLUSION

SAVEMORE was created to encourage people to save today and build tomorrow.

Its model begins with disciplined savings and transparent participation. Through its participation-share structure, SAVEMORE is also building the foundation for MORE CAPITAL, an investment initiative intended to convert accumulated capital into productive investment opportunities.

The structure consists of a fixed supply of 200 participation shares (MORE). At the current paid-applicant base of 43 (as at October 2026), the calculated value is:

« 5 × 43 = ₦215 per share »

and:

« 200 × ₦215 = ₦43,000 »

This ₦43,000 represents the current MORE CAPITAL capital equivalent.

As SAVEMORE grows, the capital base is expected to develop further. When MORE CAPITAL reaches the equivalent of US$100, In Sha Allah, the intention is to deploy the capital into its first investment opportunity, BUYMORE4AFRICA, as an investor alongside other investors.

Through this model, SAVEMORE seeks to connect:

Saving → Discipline → Participation → Capital Formation → Investment → Potential Profit Distribution

while maintaining a commitment to transparency, responsible financial management, fairness and Islamic financial principles.
